Our expertise – Your benefit
Spotlight on **Hydrogen**
2024

Our global footprint | A selection of our experience worldwide

■ Spotlight on our services and experience

What we do and how we can help

Our relevant experience

Hydrogen

We are experienced in hydrogen in the UK and globally, and in the UK advising on demonstrator, portfolio, MW and GW scale green hydrogen projects, all within the relevant regulatory and state subsidy regimes.

We are recognised in the *Legal 500 Green Guide* (EMEA, 2022) for our work advising **SVEVIND Energy** on the financing and development of [one of the world's largest green hydrogen projects](#).

As a full service law firm, we have extensive know-how in all areas of law that may become relevant in the context of hydrogen projects.

In particular, our global team has extensive experience in energy regulatory law, energy trading law, and public commercial law. We have successfully advised on the development, financing, and construction of numerous infrastructure projects, with a particular expertise in the areas of natural gas, power and renewables.

Clients benefit not only from our regional expertise, but especially from our global approach: Our initiative H2L connects our lawyers worldwide to collaborate, share experience, and learn from the developments in the hydrogen sector worldwide.

HYRASIA ONE Hydrogen Project Kazakhstan | Winner of the [FIDIC Award of Merit 2023](#)

Tier 1

Projects, Energy and Natural Resources, Legal 500 UK 2024

- Tank & Rast
- Total
- Verdantf

■ Our recent experience

Spotlight on Hydrogen

Verdantf AG

on the financing of a hydrogen conversion plant, in which communal organic waste is converted into sustainable hydrogen.

Various clients

on energy regulatory law in the context of renewable energy projects and the marketing of renewable energy and hydrogen.

A U.S. pension fund

on the investment in and establishment of a joint venture as well as on all project contracts for the realization of several biomass-to-hydrogen projects in Germany.

Dragon LNG

on the collaboration arrangements for participation in the South Wales Industrial Cluster decarbonisation project (including hydrogen production).

Rolls Royce

The Power Systems division on the conclusion of a long-term contract for the procurement of fuel cell modules from cellcentric GmbH & Co. KG, supporting the client on its energy transition particularly in the hydrogen market.

Svevind

on the development, project planning, financing and implementation of one of the world's largest green hydrogen projects, which will be built with approx. 45 GW of wind and solar farms in the vast steppes of Kazakhstan.

Mabanaft

on an acquisition of Nacomplex GmbH, a developer for power storage and co-generation plant concepts based on hydrogen.

A battery storage manufacturer

in connection with a master supply and development agreement for the sale and development of utility scale battery storage systems.
