

Technology Litigation

Our experienced team will help you assess, mitigate, or defend the new risks and endless opportunities provided by technology.

Whether you're looking at your use of data, contracting with a third party, or developing a new type of technology, we will partner with you to identify your risks and protect your opportunity in this fast moving environment. We'll help you grow your business by investigating the facts, providing dynamic representation before multiple government agencies, or defending your company in court.

Our strategic approach has helped our clients in multiple disputes including cyber incidents, data class actions, data protection, technology-based solutions and services, and products.

Representative experience

We successfully represented an Internet player in proceedings before the Court of Justice of the European Union as to whether the scope of the right to be forgotten extended beyond the EU.

We advised a leading German IT service company in negotiations and extensive fact finding regarding alleged breaches of competition law in connection with software source code.

Represented online platforms facing claims in relation to the alleged violation of the French Data Protection Act before the
